

# HYTILE NEWSLETTER

SUMMER 2019

## In this issue:

- Christmas trading hours
- Service Tips for your Tilecutter
- Bedding Frames
- Instant Asset Write-off
- Financing new equipment
- Batten Trolley

*Thank you very much for your custom this past year  
– we appreciate it.*

*From all of us at Hytile we'd like to wish you and your families a  
very Merry Christmas, and a safe, prosperous and happy New Year.*

## CHRISTMAS BREAK

Hytile's last day of trading is Monday 23rd December.

Local customers who think they'll need supplies over the holiday period can come by until lunchtime on this day and we'll get you sorted. Faye will be firing up the BBQ, so feel free to join us for a beer and a snag if you're going by.

Interstate customers please aim to get any last-minute orders in to us by Tuesday 17th. If you'd like a snag too, perhaps head to your local Bunnings!

We resume trading on Monday 6th January, 2020

**Tilecutter and  
Trimming Tray**

## Hytile Solar Panel Lifter

We've taken the heavy lifting out of getting your solar panels to the roof. This machine can also be used to take up and down all the tools needed for your job.

Visit <http://www.hytile.com.au/our-products/solar-panel-lifter> to see what our customers have to say about their Hytile Solar Panel Lifters.

## A Bedding Frame to suit your job

Use a HYTILE Bedding Frame to ensure your hip and ridge tiles are laid in straight, even lines. There are 7 models to choose from:

**STANDARD: 3.6 mtr (12ft)** This model is made from tempered aluminium and is light and easy to handle. The thick layer of sponge rubber on the underside gives it added grip on steeper roofs.

**SHORT STANDARD: 1.8 mtr (6ft)** As above, but shorter. Ideal for short, steeper hips. Quick and easy to use and handle.

**EXTENDABLE: 4 - 6.1 mtr (13-20ft)** Made from plated tubular steel, this model extends from 4 metres to 6.1 metres. Great for long hips.

**SHORT EXTENDABLE: 1.8 - 3.4mtr (6-11ft)** As above, but shorter. It extends from 1.8 to 3.4 metres and is quick and easy to use and handle. Ideal for small jobs.

**ECONOMY: 3.2mtr (10ft 8in)** This sturdy no frills model is made from plated 25mm tubular steel.

**SHORT ECONOMY: 1.8mtr (6ft)** Same as above but shorter.

**LONG ECONOMY: 4.5mtr (15ft)** As above but longer.

# \$30,000 INSTANT ASSET WRITE-OFF

The Government's threshold for the Instant Asset Write-off scheme has increased to \$30,000. Up until 30th June next year businesses can use simplified depreciation rules to claim an immediate deduction on purchases. What this means is you can claim the total deduction of around \$3,000 for a new Cable Hoist or Belt Elevator straight away, instead of over 5 years.

## FINANCING A NEW CABLE HOIST OR BELT ELEVATOR

Financing a new Cable Hoist or Belt Elevator will set you back each week around the cost of a slab and a half of beer. There are a couple of alternatives to consider:

**PERSONAL LOAN - from bank:** A personal loan from your bank is one convenient way to up-date your old equipment. If the bank is happy with the way you have used your account, they can usually give approval for a loan the same day. On this type of loan all interest is fully tax deductible.

**What this means, effectively, is that you claim the full cost of your machine back in just a few years.**

**LEASING:** If your credit rating is okay, or you can arrange a guarantor, the leasing finance will be granted. All lease payments are tax deductible.

**Hytile's contact for Leasing is: Malcolm Hall  
AMH Vehicle & Equipment Finance  
Phone: 03 9440 8222**

*Malcolm would be pleased to answer your questions obligation-free, and he can assist you Australia-wide.*

The benefit of one method of finance over the other will depend on what suits your own particular situation or structure. Your accountant is probably the best person to give you this advice. You'll need to assess your own individual needs. Depending on your personal circumstances, purchasing new equipment before the end of this financial year might make very good sense for you and your business.

## Hytile Batten Trolley

In today's market where block sizes are becoming smaller, the options for loading a roof from all sides are limited. In these situations, the Hytile Batten Trolley can be a big advantage in speed and energy saving. Just load up the trolley and your tiles are transported from one end of the roof to the other with a minimum of physical effort.

Batten Trolleys are particularly useful on long gable roofs.

**View one in action on our website at:
