

BUILDING INDUSTRY ROLLS ON

In spite of our global concerns the Australian building industry is continuing on in a healthy state. At this stage, last year's pace looks set to carry on for some time. Interest rates remain historically low, and confidence in the market place is high.

We wish you a successful 2003.

Ridge Tarps can be rolled out and fixed from one to seven metres and are made from heavy duty polyethylene with extra U.V. protection.

SUPPORT YOUR BACK SO IT CAN SUPPORT YOU!

Few jobs put as much strain on your back as Roofing.

During our 37 years in the industry, we at Hytile have witnessed the progressive deterioration of the backs of many of our customers. A "crook back" can substantially shorten your productive working life, and can also impact on your enjoyment of activities outside of work.

We are often asked about back supports, and are now pleased to report that after road testing a support manufactured by Back Aid Australia, we have decided to stock this Worksafe award-winning product.

A long-time customer of ours, Kevin Reynolds from Realistic Roofing, who tested the back support for us says:

"It's the best one I've tried There's more support. It's more comfortable and not as hot as others I've used, and takes a lot more of the pressure off my discs. I feel much better the next day. It's also a good pro-active measure to take with my employees."

NEW MODEL BELT ELEVATOR

Our new model Hytile Belt Elevator will soon be available!
