

## In this issue:

- Up-date your equipment?
- TAFE awards night
- Leasing Equipment
- Hytile at Hallam
- Wire rope adjustments
- Blundstone 505's

## business success

All successful businesses have things in common: Knowledgeable, friendly, productive staff, always available to help their customers, and good, reliable equipment that does the job required of it.

### How does your business stack up?

Old, unreliable equipment costs you time and money.

If yours is worn out and letting you down it might be time to contact Hytile's knowledgeable, friendly staff to see about up-dating it. Our latest model hoists are our best yet, and we can help you with all of your roof tiling requirements.

## TAFE ROOF TILING APPRENTICE AWARDS

The Holmesglen Institute of TAFE Roof Tiling awards night was held in May. Pictured here are award recipients James O'Dowd, Matthew Eldridge and Michael Dorset with teachers Mike Howman and Steve Chadwick

## How much will it cost to lease/finance your equipment?

Repayments for a folding two section Cable Hoist with rapid return would be around \$55 per week (paid back over 5 years), or around \$115 per week (paid back over 2 1/2 years).

Call Caroline or Cheryl on 03) 9725-4488 for further information.

## HALLAM BRANCH OF HYTILE

Hytile now have another outlet in Hallam. Call in to see Peter – he can help you with:

- Repairs & servicing

# Get more life out of your Wire rope and Drive Wheel

A new wire rope will stretch approximately 80cm during the first couple of jobs. Correct wire rope tension will ensure a longer lasting wire rope and reduce wear on the Drivewheel.

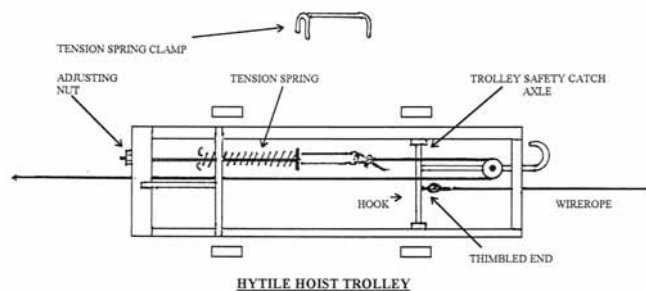

## Check The Wire rope Tension As Follows:

Place the TENSION SPRING CLAMP over the TENSION SPRING in the TROLLEY. (To compress the tension spring, pull up on the WIRE ROPE in front of the trolley.)

With the tension spring clamp over the tension spring the THIMBLED END of the wire rope should reach no further than the HOOK on the TROLLEY SAFETY CATCH AXLE. If the thimble end can be pulled past this hook, take up the slack in the wire rope by adjusting the ADJUSTING NUT at the back of the trolley.

When the wire rope has been set up and tensioned, put up two pallets of tiles and check the tension once again. Repeat this after 3 more pallets, and again after another 5.

Wire rope should now be stretched to its fullest capacity.

## Blundstone 505 Workboots

Blundstone 505 workboots, the Roof Tilers' choice, are now available at Hytile.

## RIDGE TARPS

### Eliminate job washouts

Protect your bedding and pointing in wet weather with a Ridge Tarp. Designed by a roof tiler for roof tilers, these heavy-duty polyethylene tarps are quick and easy to use. Available in 7 metre rolls.

## tilecutter & trimming tray

*Are you still using an old cutter? Try our current model for a great job with less effort.*
